The carnings of the Hudson River Railroad Comincluding Thursday, Feb. 1, 1865:-

pury is January amounted to \$209,511, against \$209,400 for the corresponding month last year-showing an increase this year of \$6,105. The Marice Bank has declared a dividend of four per cent; the Oriental Bank, three and a balf per cent, payable on the 10th tast.; Loridard Fire Inoe Company, four per cent; Wells, Fargo & So a Express, five per cent.

Persign exchanges continue quiet. We have no change to make in quotations, but it is the impresmen that rotes for the next steamer will rule lower. Judge Roosevelt, of the Supreme Court, gave an order this morning declaring the Empire City Bank msolvent; that the assignment made by the bank is void; that the bjunction be permanent, and that the United States Trust Company be receiver.

Legislation is greatly needed to prevent france so continually occurring in our railroad companies, very many of them never coming to the kno wiedge of the stockholders until it is too late for an adequate semedy, a beautiful illustration of which has lately been exhibited in the affairs of the fisrien Railroad Company, known as "Schuyleriam." Had there been, charing his official connection with that company, menthly reports of their affairs in a concise form, as is now in contemplation, by authority of the Legis. Directors of all railroad companies never impart any information of its affairs and business to their stock. holders or anybody else unless compelled, and it is high time that our Legislature passed measures of the important character now contemplated by the m to prevent these evils. The non-publication of the Harlem report was a mystery unaccountable, but it hes no longer. With few exceptions the present divects re of the Harlem road were in the direction at the time Schuyler was present, and that for a long was prior to his sudden departure borrowed money to pay the dividence on the stock, and this appears

in the present report. If the managem of the Reading Rallroad in their report of fifty-eight pages had devoted a single one to explaining their relations with the Mi ne Hill and Schurikill Haven Railroad, it would have contained more valuable information for the stockholders than all they have given put together. It would then have appeared that several of these gentleman are personally interested in this latter road, which is the principal feeder of the Reading; and that the Reading sends its cars and engines over it a dis-tance of twenty-one miles after coal, without getting my pay for the service; so that, in fact, there are Seriy-two miles run on the Mine Hill road, besides ninety-three miles run in returning with empty cars from Richmond to Postsville, for which nothing is carned, making a total of 135 miles run at a loss, and only 93 at a profit. Now, what road can make seeb dividends on such running? Bull, the report centains some valuable information. It tells the stockholders that "the lacroses of capital stock is meyer to cesse so long as the business of the road facreases." This is taking the buil by the horas, and would not have been unworthy of the great or of the New York and New Haven Reilroad. he proof of this policy being continued, we find that the company is subscribing \$300,000 to the Lebason was company is aniscribing \$300,000 to the Lechanor Valley read; that it is purchasing we know not how much stock in the Mount Carbon road; that it has beight the Willow street road of a cost of \$160,000, the value of which "can scarcely be overestimated," but which, nevertheless, is in such a broken down condition that \$50,000 more is requisite to put it in ders and saif all this were not exone pany is going into the water-supply business, and 'negotiations are now pending with the Potiaville 'negotations are now pending with the rotaving.

Mcreover, a "moderate expenditure with the northwest; the exact amount is not stated, but an sesurance is given that it will be "insignio. cent compared with the eight millions" which these connections have cost. Add that the company is want of a merchandise and passenger depot in Philadelphia, estimated to cost \$150,000; that it is still a year for "borne power in Broad street;" is pur sing new engines and cars; is still at work on the wharves at Richmond; has a monster machine shop on its hands; has laid upwards of nine miles of new iron during the year; has transported coal at an increased expense of ten per cent, and through pessengers at an increase of nine per cent; and fashly is carrying about seventeen hundred thou-sand dollars of firsting debt at exerbitant rates of

The annual report of the Connecticut River Railroad Company has just been published:—
The receipts from passengers for the year ending Dec. I wees \$120,900 against \$123,606 for the preceding year, and from freight \$130,508 against \$113,704 for 1853, and the total receipts for the year 1804 were \$177,770 against a total of \$253,221 for 1853. The total expenses for 1854 were \$190,046, including \$16,118 paid for interest on debt, and \$30,000 for rent of the Ashuelot railroad ranking from South Vernon to Keene. The net revenue for the year has been \$36,523, yielding a divisend of 4½ per cut on the old or unpreferred stock. The whole number of passengers carried over the road in 1854 was 24,920, in 1852, 237,000; in 1852, 239,000. The number of one of freight transported in 1854 was 102,850; in 1853, 99,920; in 1852, 73,216. The increase last year was much greater than the increase of 1852 over 1851.

The same causes which have absorbed all the in-

The same causes which have absorbed all the in cream of gross receipts upon other milroads have been largely increased by the increased cost of fuel labor and materials. In consequence of this the amile, sat as average advance of about fiftien per cent has been established upon its old prices for freight and passenger transportation. If this does not suffice for a fair profit the directors intend to make another advance in the charges, wisely resolving to obtain a desent remuneration for their work and capital, if it be possible. There is a point however, at which high fares will either invite a remove competition or diminish the amount of traf-fie, and this should be carefully avoided.

Total movement...... \$2,797,275 \$2,999,192 \$1,878,313 This week's business in dry goods has been a little more extensive than that of the previous one; but the effect of this riight increase is not very encourag ing, as the partial revival has been brought about only by some trivial concessions in prices, especially of dementic cottons—the supply of which is larger and more freely offered. Domestic wooliens are about as cheap now us they are expe fed to become; and this circumstance is eliciting rather more assen ties to their from buyers, particularly from the remote country districts. Foreign rabrics have not, as jet, been much neticed; but with a miderate quantity in market, and rather limited teaports, there is considerable firmness displayed by factors, who are gaining greater confidence in the future of

Choice makes of brown sheetings and shirtings are in fair request, and steady; while bleached goods generally are ic. a ic. per yard cheaper, yet inactive. Octon flamels are quiet and languid Denime are dull and deciming. A moderate demand prevails for drille at former prices. Duck is becom-ing pleatier, and is very heavy. Ginghams have net varied much. Lawne are mactive and somewhat nominal, in private. Two auction sales of lawns have been held, according to previous an nouncement, this week—one on Tuesday, the 30th ult., when Mesera Haggeriy, Jones & Co. sold 650 tases of Ledi lawse. The sale was peremptory one, on eight months credit, and the first lot offered was obtained at 840; the last lot brought 64c., and was the only lot sold under 7c. brings ofc. and was the only to war maner to.
the highest price realized was 9 to., and the average
of the whole sale was 8 to. The lots most eagerly
hid for were madder checoiste at 8 to., and black
and white at 8 to. a 8 to. Extra fine chints brough Sc. a Sic. The second mie occurred on Wednesiay,
January 31, when Means. Wilmerdings & Moon
disposed of 800 cares of the Portsmouth and Hadley
Palls nawns. The goods were all from the printery of Mesers Jacob Dunzell & Co., and Mr. Brown, of that firm, superlatended the sale. A very large comthat firm, superintended the sale. A very large com-pany of first class houses were represented, embrac-ing a few from Philadelphia, but a much larger num-her, in proportion, from Battimore and Boston. The designs were acknowledged to be in good taste, and the printing was beautifully executed. The prices realized were below the average of last year, but were as high as we expected, considering the times. The range was mostly 10c. a 11/2, averaging about 10/2c. The average last year was 11/2c; average in 1869, 13/2c; do. in 1862, 12/2c. Mankins and cart-burgs are without essential variation being do!

burgs are without essential variation, being dull and heavy. Printing cloths are in rather better re-quest, at steady rates. A few fresh styles of prints

in demand, and are firm. Stripes are rather

brisher, but a little easier. Ticks are still abundant and depressed. We have no important changes in weelen fabrics to notice. The supply is fair enough for the season, while the demand is an extremely imited one, though it is gradually improving. Prices are about as lew as they can well go. Any alteration in these is most likely to be favorable to factors. Markets are unchanged. Fancy cassingers are in some request at former rates; while cloths, deskins, finnels and jeans are generally quiet and depressed. A little more activity is noticeable in lineage, mainly at 14:, per yard. Mouslin de laines are attractifg increased attention, and are very firm. Satinets and tweeds remain about the same. Foreign productions are not over-abundant; but the absence of any hing like an active demand debars any bricker, but a little easier. Ticks are will abundant sense of any hing like an active demand debars any improvement in the business therein. There are some country dealers here, but they have not as yet began to buy with much freedom; and our local jobbers may be said to be doing nathing at all in the way of purchasing; for, so far, their operations have been quite insignificant. Resawhile, this encourage ing to notice that importers are quite casy in their minds regarding the future, as they have done everyminds regarding the future, as they have done everything in their power to prevent any new reaction
that might be injurious to the trade; and as the supplies are not likely to much exceed the anticipated
wants of consumers, prices are acquiring increased
steadiness, and are apt to be, at least, well support
et, particularly in the case of some favorite styles
of dress goods, whereof there is not a great dea
here, and there promises to be a continuous exactly
for some time ty come. These circumstances nurture
the hope that we have passed by the most trying
times, and will hereoferward be able to discover.

Brusher, I probled over a thousand bottles of this in the vicinity of Boston. I know the effects of it in every case. To sure as water will extinguish fire, so sure will this care bymor. I sever acid a bottle of it but that soip another; after a trial, it always speaks for itself. There are two things about this herb that appear to me surprising—first, that it grow in our partures, in some places quite plentifed, and yet its vaine has never been move until I discovered it in 1846 second, that it should care all kinds of humor. In order to give some idea of the mode in rise and great popularity of the discovery, I will state that in April, 1861, i padded it, and soil about its bottles per day. In April, 1864, i and soil about its bottles per day. In April, 1864, i and soil about its bottles per day of it. No change of clot eyes neces any; sat the best you can get and enough of it.
